Faculté des Sciences et Techniques

Your digital learning environment at University of Limoges

Serge Bailly

Thomas Fredon

Université de Limoges

- **How to log in?**
  - Credentials
  - Networks

- **What can I find?**
  - A virtual learning environment (ENT)
  - A webmail + an office suite
  - Many documentary resources
  - A learning platform (Moodle)
  - Application servers

How to log in?

- Your username : « name01 »
  (the first six characters of your surname)

- You were given a default password
  (usually your student number) at the end
  of your registration process

- **Mandatory** : change your password!

How to change my password? (1/2)

https://ent.unilim.fr/

A secure password:

- At least 1 digit + 1 lowercase + 1 uppercase
- Between 8 and 24 characters

How to log in?

Two available WiFi networks which can be used:

- UNILIM-ETUD-PERS : open network, with temporary connections

- Eduroam : secure network, available in almost all higher education institutions (in France and Europe)
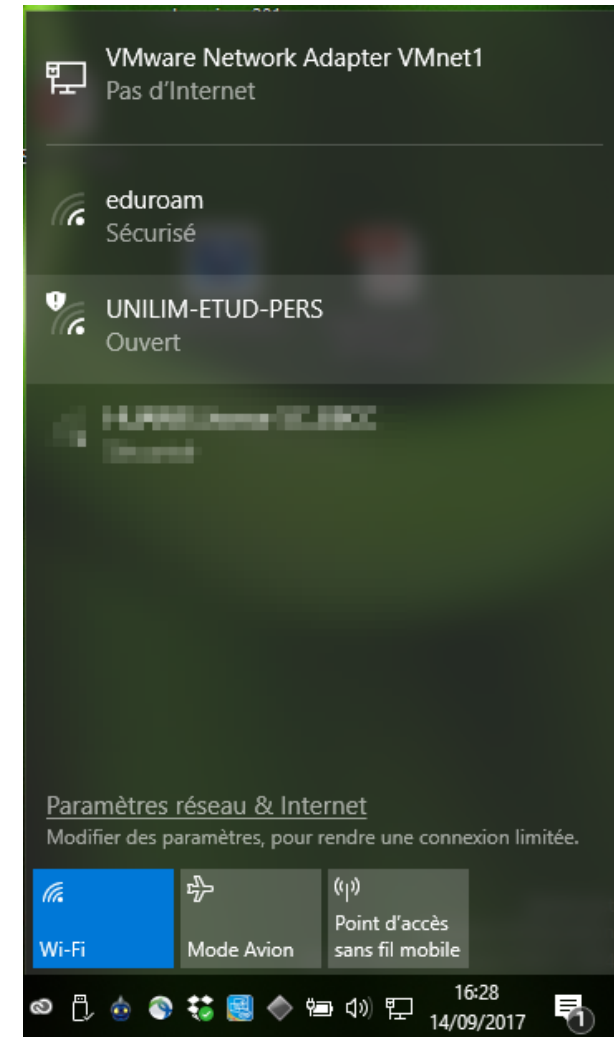

Eduroam configuration

- Configuration address:
  http://unil.im/eduroam

Configuration Assistant Tool
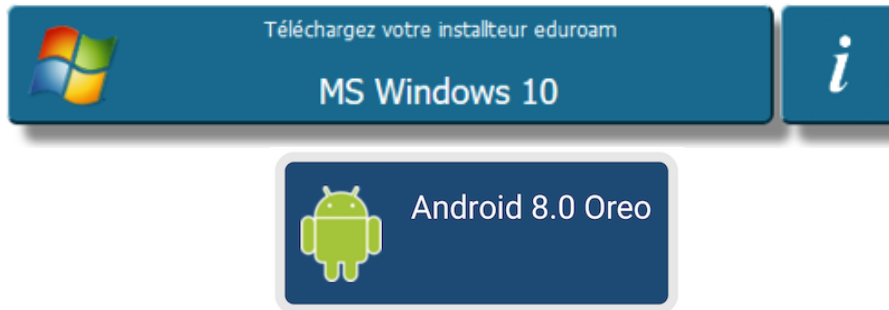

- **Be careful!** During the step asking you to enter your username, add « @unilim.fr » after your UNILIM's username (example : durant10@unilim.fr)

For all your technical problems

- A website (in FR): https://support.unilim.fr/

- An email: thomas.fredon@unilim.fr
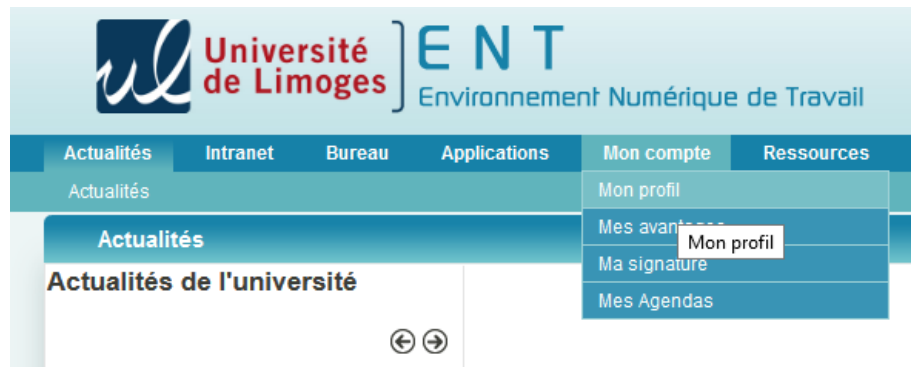

My digital environment at UNILIM

- A virtual learning environment (ENT)
 https://ent.unilim.fr/

- Useful to access many services:
  grades, benefits, office suite, webmail…

An office suite at your disposal (1/3)

- Partnership with Microsoft
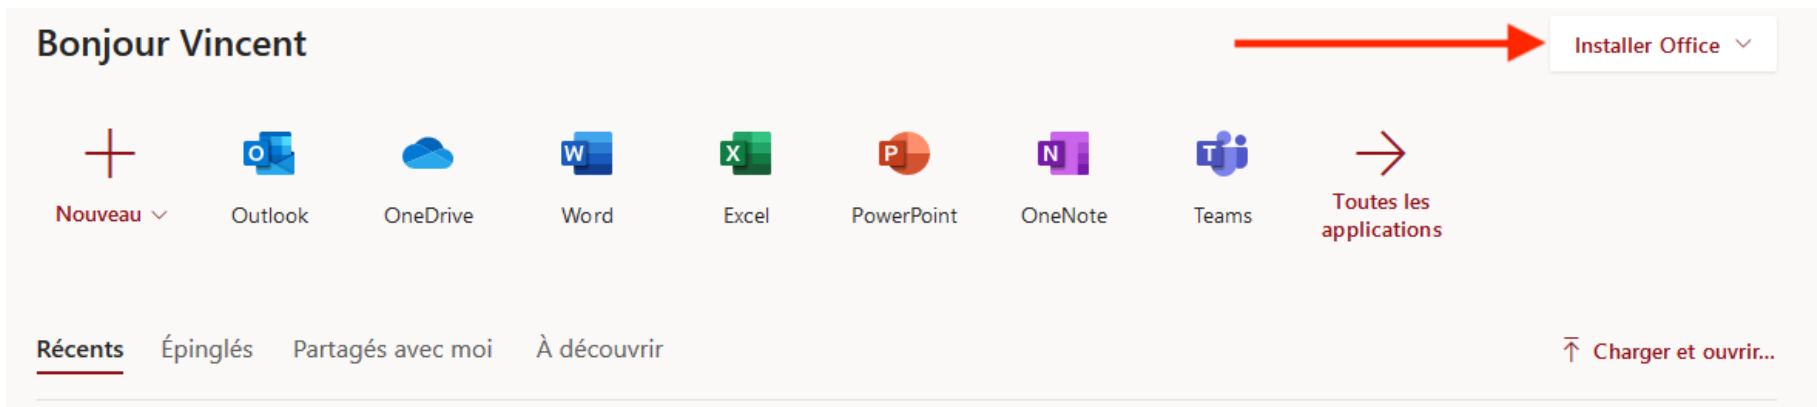

- Suite « Office 365 for Education » available from the ENT

- You can install it on your computer:

- Up to 5 possible installations

An office suite at your disposal (3/3)

- You can also use it online for collaborative work

- Provided by Microsoft© for Unilim

- You can use it online (through the ENT)

- You can use it through Outlook (installed with the Microsoft Office Suite)
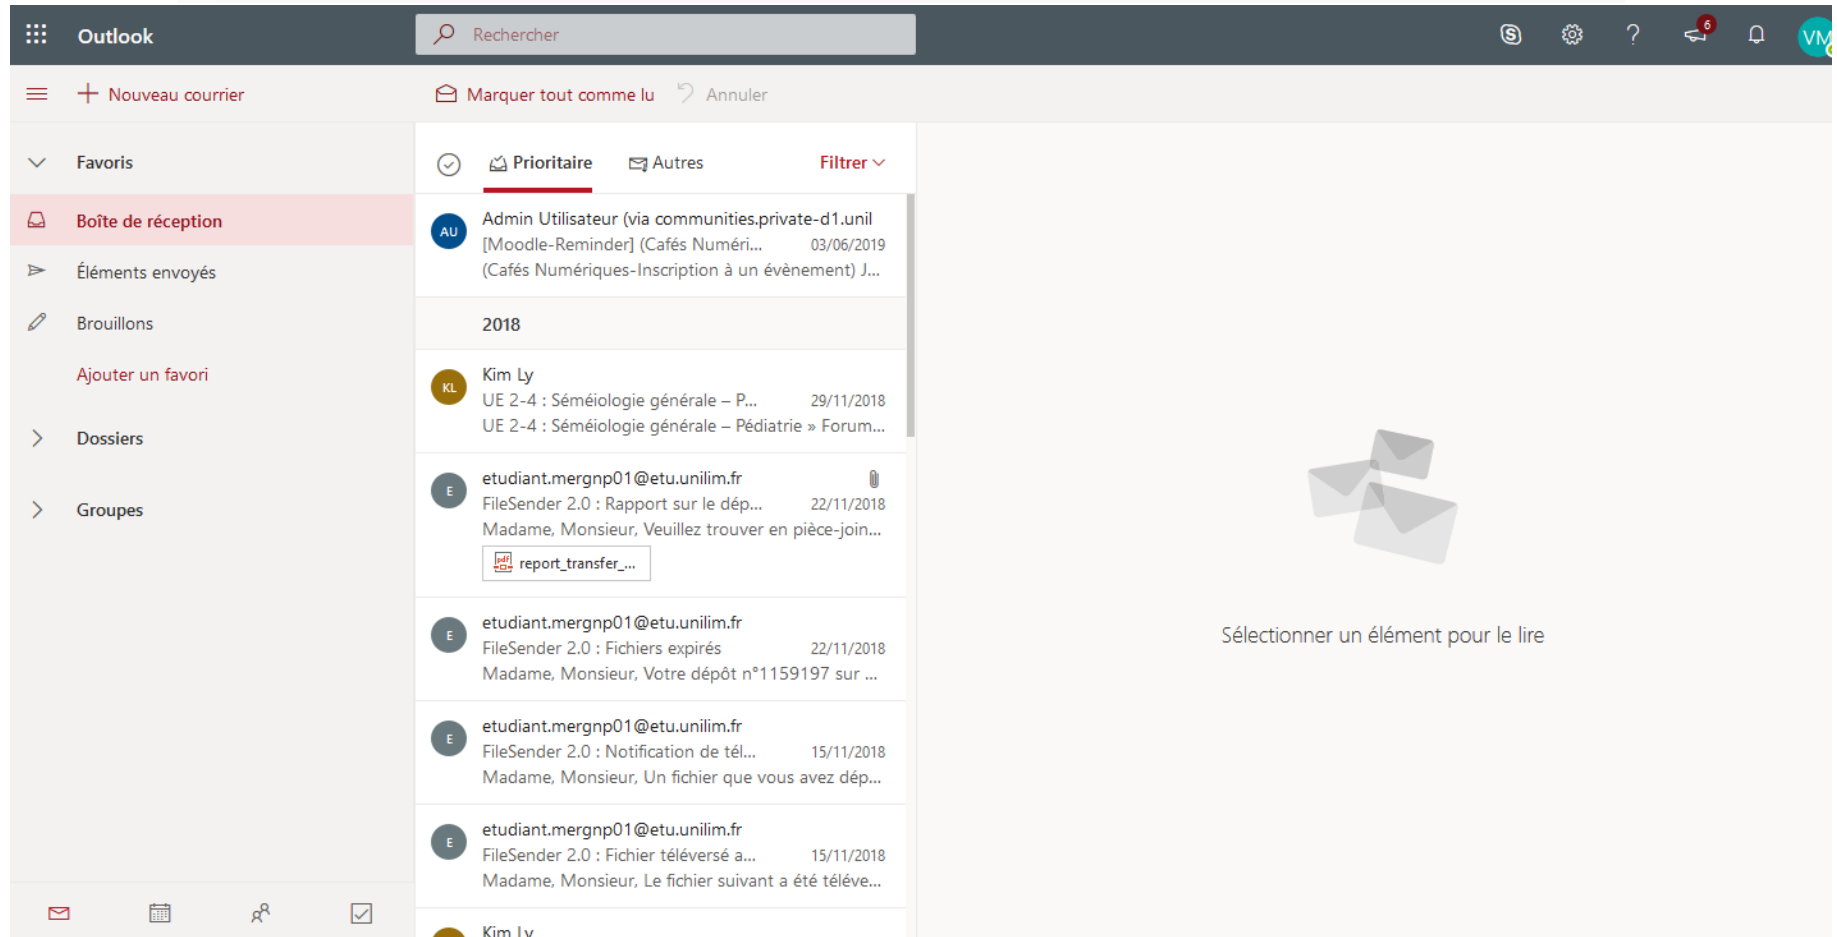

To use it online: https://ent.unilim.fr/

About webmail (3/3)

Documentary resources

Accessible from the ENT or directly on the SCD website (*Service Commun de la Documentation* in French): https://www.unilim.fr/scd/

- A community project
- The community for Sciences:
https://community-sciences.unilim.fr/
  – For all the useful information
  – To go further in the course
  – To review
  – To find additional resources
  – To submit your homework
  – To interact with the teachers
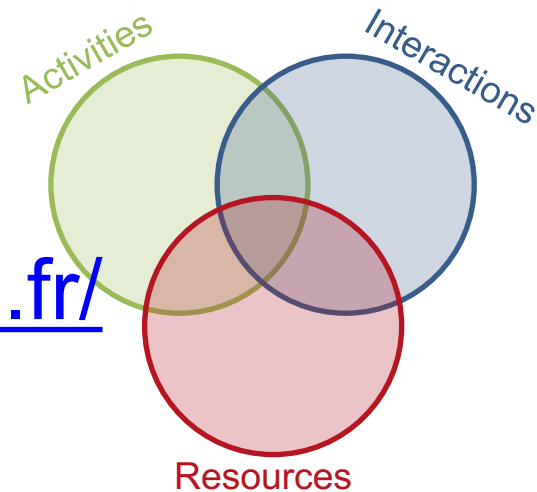

- Be careful at your professional ethics

- Beware of copycat... which can lead you to disciplinary sanctions!

- A tool:

A VPN to have access to UNILIM's tools

- Your password need to have been changed

- **VPN** = *Virtual Private Network* (allows you to have access to all the different tools of UNILIM from outside, as if you were connected from inside the campus)

- You need to install **Cisco AnyConnect**: https://support.unilim.fr/reseau/acces-vpn/service-vpn-de-luniversite-de-limoges/

Application servers

- An application server = a server solution that provides a set of **specific software** for networked users

- Required to access **specific business software** (Labview, ADS, VSA, Matlab…) and **remote practical works**

Different application servers

- Two different application servers:
  - **win-phys-3.unilim.fr**
  - **win-phys-4.unilim.fr**

- Each application server hosts specific softwares that can't be found on the other one

- Some tools available on both servers

1. Look for the **Remote Desktop Connection** software

2. Enter the application server's address

3. Enter your credentials: **be careful, you must add « AD\ » before your login!**
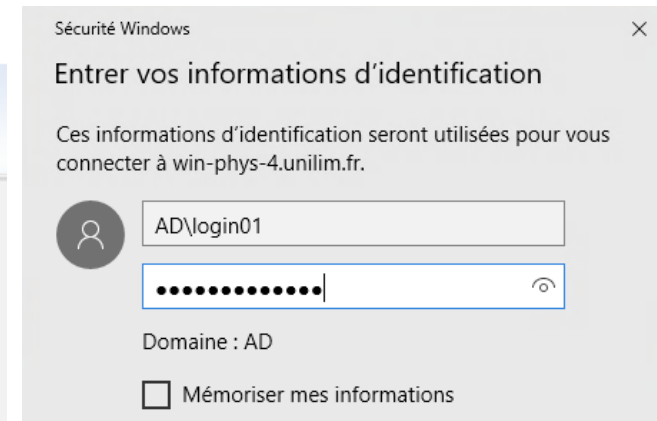

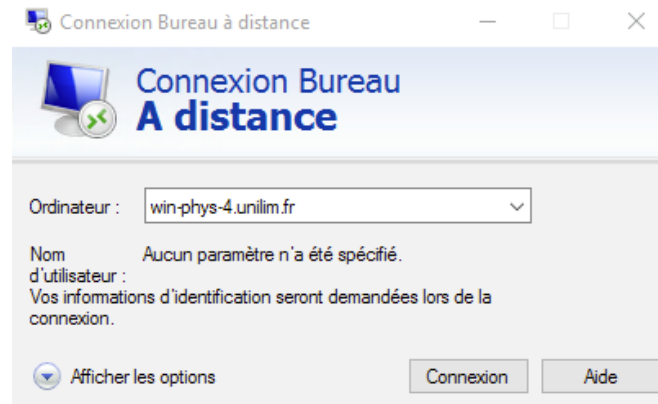

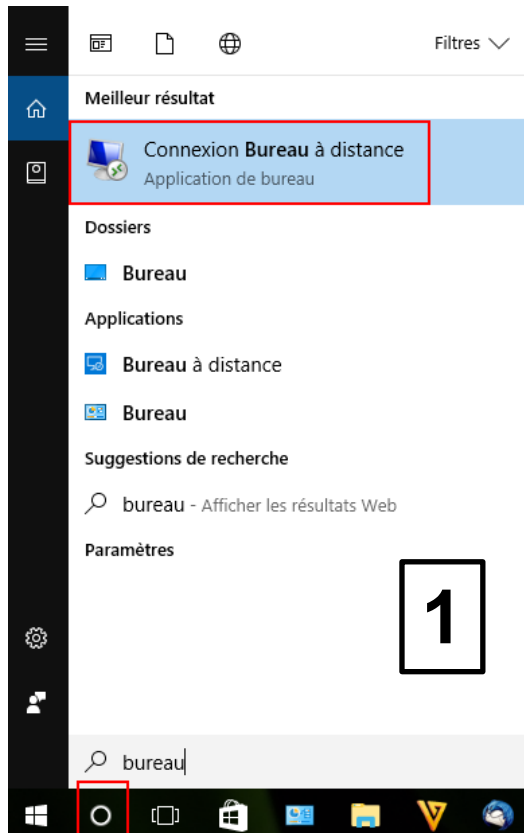

Connection to the application server (MacOS)

1. Install **Parallels Client** (from the AppStore)
2. File > New connection > RDP Standard
3. Enter the application server's address
4. Enter your credentials:
   be careful, you must add « AD\ » before your login!

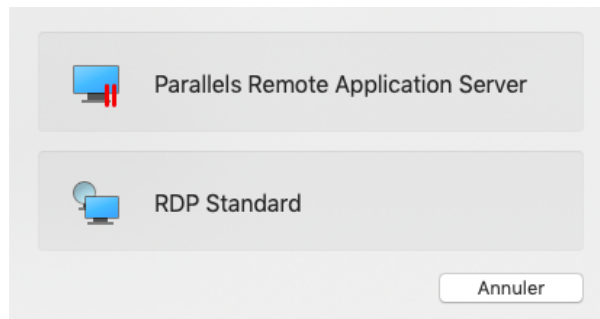

Parallels Client
